

BV-C2905 SWIR Line Scan camera

The BV-C2905 is a compact and robust line scan camera and employs the sensor having the sensitivity on SWIR (Short Wave Infrared) range from 950nm to 1700nm.

BV-C2905 is a SWIR line scan camera and uses an InGaAs sensor which is 25 micron pixel size and its sensitivity is from 950nm to 1700nm. The interface is supported either Camera Link or Gigabit Ethernet complying with GigE Vision® and GenICam™. The lens mount is C mount and lenses larger than 1-inch can be used. BV-C2905 can inspect dust, scratch or foreign substances which a visible length camera cannot catch or the conditions inside the package.
